Karas Montez paper on college major, health cited in Pacific Standard

A research study co-authored by Jennifer Karas Montez, was referenced in the Pacific Standard article, “Your College Major Predicts Midlife Health.” “Compared to adults who majored in one of the most health advantaged fields-business-adults majoring in some fields, such as psychology/social work and law/public policy, have nearly twice the odds of poor health,” reports the research team led by Karas Montez.

The study, “Does college major matter for women’s and men’s health in midlife? Examining the horizontal dimensions of educational attainment,” was published in Social Science & Medicine.

Wolf, Arora study on PFL, nursing home costs featured in JPAM

A synopsis of “Does Paid Family Leave Reduce Nursing Home Use? The California Experience,” written by Doug Wolf and Kanika Arora ‘15 PhD (PA), was featured by the Journal of Policy Analysis and Management (JPAM) and will be published in the winter 2018 issue. The key finding is that California’s Paid Family Leave act appears to have reduced the rate of nursing home usage among the older population. This type of policy effect is likely to produce a substantial reduction in Medicare and Medicaid costs.

Harrington Meyer article on grandparenting published in IIA journal

Madonna Harrington Meyer and co-author Amra Kandic explore the growing diversity in grandparenting in their article “Grandparenting in the United States,” published in Innovation in Aging.
