The Long-run Effect of Air Pollution on Survival

Julian Reif

Associate Professor of Finance and Economics

Geis College of Business

University of Illinois

Julian Reif is Associate Professor of Finance and Economics at Gies College of Business, University of Illinois. He is also affiliated with the National Bureau of Economic Research, J-PAL North America, the Wilson Sheehan Lab for Economic Opportunities, and the Institute of Government and Public Affairs. His research has been supported by J-PAL North America, the National Institutes of Health, the National Science Foundation, and the Robert Wood Johnson Foundation.

Professor Reif is an applied microeconomist whose research focuses on the determinants and value of health. He has studied the health and medical spending effects of air pollution, the health and drug utilization effects of Medicare Part D, and the value of medical innovation. He is also a Principal Investigator of the [Illinois Workplace Wellness Study](#). He has received the Kenneth J. Arrow Award for the best published paper in health economics and the NIHCM Foundation Research Award for outstanding published work in health care. His studies have been featured in numerous media outlets, including *The New York Times*, *The Wall Street Journal*, and *The Washington Post*. He currently serves as coeditor at *The American Journal of Health Economics*. <https://julianreif.com/>
